

Lorena Rodrigo received her Bachelor's degree in Biology and her Ph.D. in Reproductive Genetics at Valencia University, Spain.

Lorena Rodrigo has over 16 years of clinical and research laboratory experience, starting at IVI University Institute (Valencia, Spain) and actually at IGENOMIX (Valencia, Spain). Becoming interested in chromosomal studies in spermatozoa from infertile patients and their implications in the reproductive outcome, she completed her PhD in the field of Reproductive Genetics in 2013. At present, she is the Lab Director of the Preimplantation Genetic Diagnosis program for chromosomal disorders at IGENOMIX (Valencia, Spain), involved in molecular and cytogenetic testing of sperm and embryos.

Lorena Rodrigo received the Accreditation in Human Genetics from the Spanish Association of Human Genetics (AEGH) in 2012. She has over 30 peer-reviewed publications in respected scientific journals. She has presented at many national and international conferences.
